PROFILE SUMMARY

A Full Stack Developer who started learning coding the very first day of college and now it been 2 years of my coding journey, deeply passionate about embracing new challenges and crafting innovative solutions , always eager to learn and grow in the ever-evolving world of technology.

ACADEMIC PROJECTS

HomeNeeds

Recipe and Shopping List Management App
A web application that enables users to manage recipes and shopping lists. Users can securely log in, perform recipe CRUD operations, and upload recipes through a form with dynamic fields for adding ingredients. The app also allows users to add ingredients directly from recipe details.
Tech Stack: Firebase (Authentication , Database , back-end) , Angular , Bootstrap

Next JS HomeNeeds

Enhanced Recipe and Shopping List Management App
Migrated and enhanced the original HomeNeeds app using Next.js. Features include user authentication with email verification, password reset, and a dynamic recipe upload form. Authenticated users can manage their profiles, view and edit their recipes, and access other users' profiles. Unauthenticated users can browse recipes and shopping lists.
Tech Stack: Next.js (Front-end and Back-end), MongoDB Atlas, Bootstrap

E Management

Web App for Employee Data Management
Created a web application for managing employee data, featuring user authentication (login, sign-up, password reset) and a user-friendly form for data entry. Authenticated users can view, manage, and upload employee information
Tech Stack: Angular, Node.js, Express.js, MongoDB

EDUCATION

- **B.Sc** MLK PG College Balrampur (2019 - 2022)
- **BCA** Integral University Lucknow (2022 - Present)

KEY SKILLS

HTML ❖ CSS ❖ JavaScript ❖TypeScript ❖ Next JS ❖ Angular ❖ Node JS ❖ Express JS ❖ MongoDB ❖ Bootstrap ❖ Tailwind CSS ❖ GitHub
